ELSEVIER International Journal of Mass Spectrometry and Ion Processes 142 (1995) 243–245

Subject Index

Accumulated trapping
Enhanced accumulated trapping efficiency using an auxiliary trapping electrode in an external source Fourier transform ion cyclotron resonance mass spectrometer 143
Asymmetric ion accumulation
Enhanced accumulated trapping efficiency using an auxiliary trapping electrode in an external source Fourier transform ion cyclotron resonance mass spectrometer 143
Atomic weight
The absolute isotopic composition of cerium 125
Auxiliary electrode
Enhanced accumulated trapping efficiency using an auxiliary trapping electrode in an external source Fourier transform ion cyclotron resonance mass spectrometer 143

Beam-induced ionization
An investigation of the ionization processes occurring in fast atom bombardment (FAB) for perhydro-3a,6a,9a-triazaphenalene, a compound with high proton affinity/basicity and hydride donor properties 41
Benzhydrol derivatives
Formation and electrocylization of gaseous α-phenyl-*ortho*-quinodimethane radical cations 195
Beryllium
A SIMS method for $^{10}Be/^{9}Be$ ratio measurement in environmental materials 55
Born–Oppenheimer approximation
Non-adiabatic effects in ion/molecule reactions 31
Buffer gas cooling
Quadrupole excitation of stored ion motion at the true cyclotron frequency 95

Cerium
The absolute isotopic composition of cerium 125
Chemical ionization
Oxygen-18 incorporation in NICI spectrometry: the role of O_2, H_2O and rhenium oxides in surface-assisted oxidation reactions 177
Condensed phase
An investigation of the ionization processes occurring in fast atom bombardment (FAB) for perhydro-3a,6a,9a-triazaphenalene, a compound with high proton affinity/basicity and hydride donor properties 41
Cosmogenic
A SIMS method for $^{10}Be/^{9}Be$ ratio measurement in environmental materials 55

Double-charge-transfer spectroscopy
Double ionization to singlet and triplet electronic states of CCl_4^{2+} 117
Double-ionization energy
Double ionization to singlet and triplet electronic states of CCl_4^{2+} 117
Drift tube
Design and performance of new drift-velocity filter for ion swarm experiments 151

Electrocyclization
Formation and electrocylization of gaseous α-phenyl-*ortho*-quinodimethane radical cations 195
Electron affinities
Formation, stability and structure of radical anions of chloroform, tetrachloromethane and fluorotrichloromethane in the gas phase 83
Electron impact
Electron impact mass spectrometry of indoline derivatives 23
Electron transfer
Formation, stability and structure of radical anions of chloroform, tetrachloromethane and fluorotrichloromethane in the gas phase 83
Enriched lithium
Isotopic analysis of a ^{6}Li enriched lithium sample employing the $Li_2BO_2^+$ ion beam method: verification of the theoretical accuracy 69
External source
Enhanced accumulated trapping efficiency using an auxiliary trapping electrode in an external source Fourier transform ion cyclotron resonance mass spectrometer 143

Fast atom bombardment
An investigation of the ionization processes occurring in fast atom bombardment (FAB) for perhydro-3a,6a,9a-triazaphenalene, a compound with high proton affinity/basicity and hydride donor properties 41
Fourier transform ion cyclotron resonance
Enhanced accumulated trapping efficiency using an auxiliary trapping electrode in an external source Fourier transform ion cyclotron resonance mass spectrometer 143
Formation, stability and structure of radical anions of chloroform, tetrachloromethane and fluorotrichloromethane in the gas phase 83
Theory of trapped ion motion in the non-quadrupolar electrostatic potential of a cubic ion cyclotron resonance cell 1

Fragmentation mechanism
Formation and electrocylization of gaseous α-phenyl-*ortho*-quinodimethane radical cations 195
Frequency shifts
Theory of trapped ion motion in the non-quadrupolar electrostatic potential of a cubic ion cyclotron resonance cell 1

Halomethanes
Formation, stability and structure of radical anions of chloroform, tetrachloromethane and fluorotrichloromethane in the gas phase 83
Hydride abstraction
An investigation of the ionization processes occurring in fast atom bombardment (FAB) for perhydro-3a,6a,9a-triazaphenalene, a compound with high proton affinity/basicity and hydride donor properties 41

Indole derivatives
Electron impact mass spectrometry of indoline derivatives 23
Ion cooling
Quadrupole excitation of stored ion motion at the true cyclotron frequency 95
Ion separation
Design and performance of new drift-velocity filter for ion swarm experiments 151
Ion swarm
Design and performance of new drift-velocity filter for ion swarm experiments 151
Ion trap
Quadrupole excitation of stored ion motion at the true cyclotron frequency 95
Ion/molecule reactions
Non-adiabatic effects in ion/molecule reactions 31
ISOLAB-120
A SIMS method for $^{10}Be/^{9}Be$ ratio measurement in environmental materials 55
Isotopes
A SIMS method for $^{10}Be/^{9}Be$ ratio measurement in environmental materials 55
Isotopic abundance
High precision mass spectrometric analysis of isotopic abundance ratios in nitrous oxide by direct injection of N_2O 163
The absolute isotopic composition of cerium 125
Isotopic analysis
Isotopic analysis of a ^{6}Li enriched lithium sample employing the $Li_2BO_2^+$ ion beam method: verification of the theoretical accuracy 69

$Li_2BO_2^+$
Isotopic analysis of a ^{6}Li enriched lithium sample employing the $Li_2BO_2^+$ ion beam method: verification of the theoretical accuracy 69

Mass determination
Quadrupole excitation of stored ion motion at the true cyclotron frequency 95
Mobility
Design and performance of new drift-velocity filter for ion swarm experiments 151

Negative ion chemical ionization
Oxygen-18 incorporation in NICI spectrometry: the role of O_2, H_2O and rhenium oxides in surface-assisted oxidation reactions 177
Nitrous oxide
High precision mass spectrometric analysis of isotopic abundance ratios in nitrous oxide by direct injection of N_2O 163

O_2 reactions
Oxygen-18 incorporation in NICI spectrometry: the role of O_2, H_2O and rhenium oxides in surface-assisted oxidation reactions 177
Orbital–rotational coupling
Non-adiabatic effects in ion/molecule reactions 31
Oxygen-18 incorporation
Oxygen-18 incorporation in NICI spectrometry: the role of O_2, H_2O and rhenium oxides in surface-assisted oxidation reactions 177

Penning trap
Theory of trapped ion motion in the non-quadrupolar electrostatic potential of a cubic ion cyclotron resonance cell 1
Perturbation theory
Theory of trapped ion motion in the non-quadrupolar electrostatic potential of a cubic ion cyclotron resonance cell 1
Protonation
An investigation of the ionization processes occurring in fast atom bombardment (FAB) for perhydro-3a,6a,9a-triazaphenalene, a compound with high proton affinity/basicity and hydride donor properties 41

Quadrupole excitation
Quadrupole excitation of stored ion motion at the true cyclotron frequency 95
ortho-Quinodimethane radical cation
Formation and electrocyclization of gaseous α-phenyl-*ortho*-quinodimethane radical cations 195

Radical anions
Formation, stability and structure of radical anions of chloroform, tetrachloromethane and fluorotrichloromethane in the gas phase 83

Semiempirical calculations
Double ionization to singlet and triplet electronic states of CCl_4^{2+} 117
SIMS
A SIMS method for $^{10}Be/^{9}Be$ ratio measurement in environmental materials 55
Surface-assisted oxidation
Oxygen-18 incorporation in NICI spectrometry: the role of O_2, H_2O and rhenium oxides in surface-assisted oxidation reactions 177

Thermal ionization
Isotopic analysis of a ^{6}Li enriched lithium sample employing the $Li_2BO_2^+$ ion beam method: verification of the theoretical accuracy 69
The absolute isotopic composition of cerium 125
Trapped ion cell
Enhanced accumulated trapping efficiency using an auxiliary trapping electrode in an external source Fourier transform ion cyclotron resonance mass spectrometer 143
Velocity filter
Design and performance of new drift-velocity filter for ion swarm experiments 151
